Section 301. DISTRICT BOUNDARIES

The boundaries between base zoning districts are, unless otherwise indicated, the centerlines of streets, lanes, water courses and rights-of-way of power lines, railroads and other public utilities or such lines extended or lines parallel thereto. Where uncertainty exists as to the location of any of the said boundaries as shown on the Zoning Map, the following rules shall apply:

1. Where a district boundary is indicated as approximately following the centerline of a street, lane or watercourse or right-of-way of a power line, railroad or other public utility, such centerline shall be construed to be such boundary.
2. Where a district boundary is indicated as approximately following a lot or other property line, such lot or property line shall be construed to be such boundary.
3. Where a district boundary divides a lot or traverses an undivided property, the location of such boundary, unless otherwise specified by figures on the Zoning Map, shall be determined by the use of the scale appearing on the Map.
4. Where figures are shown on the Zoning Map between a street and a district boundary, they shall indicate that the district boundary runs parallel to the street line at a distance therefrom equivalent to the number of feet so indicated unless otherwise specified. Where scaled distances do not agree with such figures, the figures shall control.
5. Where a lot is divided into two (2) or more districts, the uses of the district which covers the larger or largest portion of the lot shall be permitted to extend beyond the district boundary a distance not greater than fifty (50) feet.
